EHR IN PRACTICE

CERTIFY HEALTH

EXTENDED PROFILE

CERTIFY HEALTH

OVERVIEW

CERTIFY Health is a unified medical practice software purpose-built for ambulatory and outpatient care, designed to streamline patient experience, clinical workflows, practice operations, and revenue cycle management through a connected operational ecosystem.

In many ambulatory practices, scheduling, intake, insurance verification, patient communication, and billing operate across disconnected systems. Staff often spend valuable time manually updating information between tools, creating delays, avoidable errors, administrative burden, and unnecessary friction for both care teams and patients.

CERTIFY Health solves this challenge by bringing front-office, patient engagement, operational, and revenue cycle workflows into a single connected platform. By reducing manual handoffs and eliminating data silos, practices can create more coordinated experiences for staff while improving convenience and continuity for patients.

Built to complement, not replace your existing technology investments, CERTIFY Health integrates with EMRs, EHRs, and practice management systems already in use.

This enables front-desk teams, clinical staff, and billing operations to stay aligned through shared data and coordinated workflows without disrupting established clinical infrastructure.

By replacing disconnected workflows with unified processes, CERTIFY Health helps practices reduce operational friction, improve staff productivity, lower denials and no-shows, and accelerate collections. CERTIFY Health supports specialty practices, multi-site groups, DSOs, MSOs, FQHCs, community health centers, and ambulatory surgery centers seeking scalable, standardized operations without sacrificing flexibility

Karen Kane
Hi Doctor, I have a question about my prescription.
Sure, please let me know
I've been experiencing some side effects.
