

CGM APRIMA

EXTENDED PROFILE

CGM APRIMA

EHR and Practice Management

OVERVIEW

CGM Aprima is a set of health IT products designed with the user in mind. The product suite includes EHR, Practice Management, and Revenue Cycle Management. Available on both Android and iOS platforms, the system is suitable for any sized practice.

The EHR software emphasizes speed and ease of use, allowing healthcare providers to input patient data quickly and accurately. Aprima EHR is a single application built on a single database and can be fully integrated with Aprima's practice management software to further increase the speed of use.

Aprima focuses on a clinician-centered approach. There are no charting templates, allowing providers to save time and chart the way they were trained to, and the software learns clinicians' preferences as they work. Aprima provides a range of EHR functionalities, including billing management, e-prescribing, patient portal and lab integration, and meets the requirements for Meaningful Use Stage 3.

The platform delivers its EHR as an on-premise system. Users can also download the Aprima mobile app for iOS and Android operating systems, which enables access through smartphones and tablets with an internet connection.

FEATURE OVERVIEW

- ✓ Patient Demographics
- ✓ Patient Portal
- ✓ Billing Management
- ✓ Clinical Workflow
- ✓ EM Coding
- ✓ Lab Integration
- ✓ Patient History
- ✓ Voice Recognition
