EHR IN PRACTICE

CHARTLOGIC PRACTICE MANAGEMENT

EXTENDED PROFILE

ChartLogic

OVERVIEW

The aim of ChartLogic Practice Management is to help practices manage their revenue streams and financial activities, such as payroll.

Rejected claims can be prevented before they occur, through the connection between scheduling and billing. The practice management software aims to reduce rejected claims to less than 5%. The eEligibility tool checks the patient's insurance in advance, at the point of scheduling, supplying a complete report on co-pays and insurance deductibles. Other key modules include patient statements, eEligibility, and a claim center, which includes a central user dashboard, with electronic superbills and electronic remittances.

Chartlogic Practice Management also allows for a one-click claims entry and therefore quick check-out of the patient. This requires much less data entry and so will save a medical practice time and money. The collection of claims is then simplified and much of the paperwork required is automated by the Collection Center.

Beyond revenue enhancement, Chartlogic offers an appointment scheduler, which can correlate individual practitioners' schedules. The reporting systems give managers workflow analysis as well as options to easily track the financials of the practice. ChartLogic Practice Management creates an 'at a glance' summary of the demographics of a practice, which allows for easy reporting and financial planning.
