EHR IN PRACTICE

ELATION EHR

EXTENDED PROFILE

OVERVIEW

Elation is a cloud-based platform delivered on a SaaS basis. Some key features within Elation include 24/7 premium support, intake forms (delivering structured data the practice can act on), online self-scheduling, e-fax, e-Rx and e-pcs, lab interfaces, a patient portal, and FREE implementation. The overarching mission of Elation is to function the way you think and flow through practice.

The cockpit view unique to Elation eliminates clicking back and forth between screens. Doctors can chart, prescribe and order lab tests from the same screen - this is the power of Elation. Building on this, only a single click is needed to bring information from a previous visit, allowing physicians the ability to correlate problems and save time. There is also the presence of a dynamic problem list which allows physicians to automate data entry and streamline office operations.

Through Elation, it is also possible to collaborate with colleagues. This is done through a slick integration with the NPI database, saving you the effort of looking up referral information and copying charts. Building on this, the integration gives you the ability to view and trend lab values tracking outcomes for an overview of an entire patient panel. This allows you to quickly identify a trend and take action.

With Elation, there is no long-term commitment as users aren’t tied into minimum-length contracts. The training provided by Elation takes no longer than an hour and can be iterated upon frequently if needed. Premium support is offered 24/7, and urgent inquiries are seen within 30 minutes.
