EHR IN PRACTICE

# ACCUMED EHR EXTENDED PROFILE

ACCUMED™ EHR

ACCUMEDIC

## OVERVIEW

AccuMed is a comprehensive practice management and EHR system that simplifies and optimizes healthcare operations. With its user-friendly interface and scalable solutions, AccuMed is suitable for practices of all sizes.

# INTEGRATED EHR AND PRACTICE MANAGEMENT SYSTEM

The platform's single database allows for seamless data synchronization across various practice functions. The real-time clinical dashboard provides a clear overview of patient and practice data, helping providers make informed decisions at speed, while the ePrescribing feature reduces errors and enhances prescription accuracy, and the electronic document management system eliminates the need for physical paperwork, creating a streamlined, paperless environment.

The system also automates lab order processing, ensuring that results are directly integrated into patient records. Customizable forms and encounters cater to different medical specialties, allowing providers to tailor documentation to their specific needs.

Automatic remittance payment posting further minimizes errors and improves financial accuracy. The enterprise-class scheduler serves as the central hub for managing appointments, helping practices optimize their scheduling processes.

# BILLING AND COMPLIANCE

AccuMed simplifies medical billing with its real-time patient eligibility verification and a rules-based billing engine. It efficiently handles intricate billing scenarios, reducing administrative burden and improving reimbursement rates. It also supports HL7 and custom interfaces, allowing connectivity with other healthcare systems and ensuring interoperability.

## SIMPLIFIED REPORTING

Reporting is made easier with preformatted and customizable reports that can be exported to office applications for further analysis.

Remote access capabilities allow practitioners to securely manage their practice from any location, ensuring flexibility and convenience. Compliance with HIPAA regulations ensures that patient data remains protected, giving providers confidence in their data security measures.

## ACCUMED PATIENT PORTAL

The AccuMed patient portal improves patient engagement by providing real-time integration with the EHR system. Every action taken within the portal is instantly reflected in the EHR, ensuring data consistency and reducing administrative redundancies. Patients can complete and sign documents digitally, eliminating manual paperwork and, again, minimizing clerical errors.

Through the portal, patients can quickly authorize treatment plans, ensuring clear communication with providers about care. A secure messaging system allows direct, confidential communication for questions, clarifications, or updates from the healthcare team.

### ENHANCED PATIENT-CENTERED CARE

For families managing multiple profiles, the portal simplifies access by letting users oversee multiple family members' healthcare under one account. Online registration further boosts efficiency with instant invitations, cutting waiting times and admin workload.

Financial transactions are streamlined with integrated payment processing, enabling secure and convenient co-

payments. AccuMed enhances patient satisfaction and retention with a smoother, more transparent healthcare experience.
