## **OVERVIEW**

PCC (Physician's Computer Company) EHR is a specialized electronic health record system designed exclusively for pediatric practices. Built to support the unique needs of child-focused healthcare, it offers tools that streamline clinical workflows, enhance patient care, and simplify practice management.

## **PEDIATRIC-SPECIFIC, INTEROPERABLE WORKFLOW**

PCC EHR is built with input from pediatricians, ensuring workflows that support well visits, immunization tracking, and growth charts. It simplifies data sharing with labs, pharmacies, and other healthcare systems for coordinated patient care.

Providers can also personalize templates to match their documentation needs without unnecessary complexity.
