EHR IN PRACTICE

CERBO EHR

EXTENDED PROFILE

cerbo

OVERVIEW

Cerbo EHR is an all-in-one platform designed for functional medicine, direct primary care, and cash-only practices. Built by clinicians, it streamlines clinical workflows, patient engagement, and billing into a single solution. Cerbo servce over 5,000 practitioners and remains fully HIPAA-compliant to ensure the secure handling of health records and patient communications.

PRACTICE MANAGEMENT

Cerbo's scheduling dashboard displays apppintments, reminders and tasks in a color-code calendar that van be filtered by provider or appointment type. The chare list and billing module alllws users to define services and set different fees for membership or non-membership patients.

Embedded credit card processing (via Stripe, Bluefin, or Propelr) supports point-of-care payments and online invoicing, while subscription billing automates recurring charges for conierge and direct-pay models.

CLINICAL CHARTING

Cerbo's charting environment is centered around its "Chart Parts" templating system. Users can insert blocks lf text, diagnoses, orders, supplements or custom treatment plans with just a few keystrokes; each template pulls context-specific data (e.g, lab results or medication history) into the notes, which can be coupled with user-defined default views so that providers can focus on what matters most during patient encounters.

INTEGRATIONS AND COMPLIANCE

Bulit to connect with 40+ lab partners, Cerbo parses incoming HL7 results, highlights abnormal values, and stroes data for trend analysis.

It supports e-prescribing (including controlled substances), integrated incoming/outgoing fax, and maintains a nationwide pharmacy directory updated through the aforementioned patient portal. Cerbo's infrastructure adheres to industry standards for data protection, ensuring patient data remains confidential and traceable.
