

DENTRIX ASCEND

EXTENDED PROFILE

OVERVIEW

Dentrix Ascend is a cloud-based dental practice management platform from [Henry Schein One](#).

It focuses on centralizing scheduling, clinical charting, billing, imaging, and patient communication in a web-based system that practices can access from any browser.

For practices already familiar with the Dentrix ecosystem, Ascend moves away from on-premise infrastructure toward subscription-based, browser-accessible software.

DEPLOYMENT AND TECHNICAL SETUP

Dentrix Ascend runs entirely in the cloud. You don't install software on a local server, and updates happen automatically.

What this means for practices:

- No server maintenance or on-site backups
- Access from multiple locations (useful for multi-site groups)
- Access from multiple locations (useful for multi-site groups)
- Internet connectivity is required for full functionality

Practices moving from server-based systems should plan for internet redundancy and review how imaging devices and third-party tools integrate with a cloud workflow.

CORE FEATURES

SCHEDULING AND APPOINTMENT MANAGEMENT

Dentrix Ascend includes a visual, drag-and-drop scheduler. You can:

- * Color-code appointments by provider or procedure
- * Set scheduled reminders
- * Manage operatory assignments
- * View production and schedule utilization

The interface gives front-desk teams a quick overview of daily and weekly schedules. For growing practices, multi-location visibility helps standardize scheduling processes.

CLINICAL CHARTING AND IMAGING

The system supports:

- * Digital odontograms
- * Periodontal charting
- * Treatment planning
- * Integrated imaging workflows

Because it's browser-based, providers can chart from laptops or tablets in the operatory. Many practices report that the layout feels modern compared to legacy systems, though learning curves vary by prior software experience.

BILLING, INSURANCE, AND REPORTING

Dentrix Ascend handles:

- * Electronic claims submission
- * Insurance eligibility checks
- * Payment posting
- * Standard financial reporting

Practices can generate production, collections, and provider reports without exporting data to other tools. Larger groups may still use external analytics platforms for deeper financial analysis.

PATIENT ENGAGEMENT TOOLS

Through the Henry Schein One ecosystem, practices can add features such as:

- * Online booking
- * Automated reminders
- * Digital forms
- * Patient communication tools

Some require higher tiers. Practices evaluating Dentrix Ascend should ask which tools are included in base pricing and which are add-ons.
